Note: I translated "Dzielenie ?upów" to "Diamond Splitting", but it's worth noting that the original title might be a play on words in Polish, and a more literal translation could be "Diamond Splitting: A Guide to Maximizing Profits in the Diamond Industry", but "Dzielenie" can also mean "splitting" but also "cutting" or "sharing" so it could be translated to "Cutting" or "Sharing" but in the context of the book it seems to be more related to maximizing profits.
